

# compare MediClear Plus®

MediClear Plus®  
(from Thorne Research)

UltraInflamX®  
(from Metagenics)

Bio-Inflammatory Plus  
(from BioGenesis)

Compare per serving price  
MediClear Plus costs less than the  
two leading competitors

MediClear Plus is the best value	costs 68% more per serving than MediClear Plus	costs 52% more per serving than MediClear Plus
----------------------------------	--	--

MediClear Plus has 40% more servings per container

20 servings	14 servings	14 servings
-------------	-------------	-------------

MediClear Plus has less than half the amount of carbohydrates

10 grams carbohydrates	25 grams carbohydrates	21 grams carbohydrates
------------------------	------------------------	------------------------

MediClear Plus contains less fat

3 grams total fat	6 grams total fat	5 grams total fat
-------------------	-------------------	-------------------

MediClear Plus contains almost twice the protein

29 grams protein	15 grams protein	15 grams protein
------------------	------------------	------------------

MediClear Plus contains Meriva (curcumin phytosome) for 45 times better absorption, ... but no curry taste

curcumin phytosome	curcumin 95% and curry taste	none
--------------------	------------------------------	------

MediClear Plus contains both grape seed and green tea phytosomes that provide enhanced absorption

grape seed extract phytosome	none	none
------------------------------	------	------

green tea phytosome	none	none
---------------------	------	------

MediClear Plus rice protein tastes so good there is no need to add flavorings and sweeteners – making MediClear ultra-pure

no sweeteners	fructose	rice syrup, stevia, xylitol
---------------	----------	-----------------------------

no flavoring	flavoring	flavoring
--------------	-----------	-----------

Our customers rely on the fact that Thorne does not add unnecessary ingredients to our products

no additives or preservatives	xanthan carrageenan	xanthan carrageenan

your partners in wellness

**NEW**  
**MediClear Plus®**  
unflavored,  
unsweetened,  
undeniably pure  
enjoy all the  
benefits of  
curcumin  
without the  
curry taste

MediClear Plus gives you more protein, fewer carbohydrates, and a lower price than the leading competitor. Plus, the enhanced bioavailability and significantly greater clinical benefits of the key plant phytosome complexes unique to MediClear Plus.

*ultra good - not ultra curry!*

## THE MEDICLEAR PLUS DIFFERENCE

### MERIVA® CURCUMIN PHYTOSOME

a curcumin phospholipid with superior bioavailability, when compared to ordinary curcumin extracts

### LEUCOSELECT® PHYTOSOME

a unique grape seed phospholipid with better absorption

### GREENSELECT® PHYTOSOME

a naturally decaffeinated green tea phospholipid with similarly increased bioavailability

### MAKE IT THE WAY YOU WANT IT

a new, better tasting, high-quality rice protein – without any flavorings or sweeteners for optimal purity and flexibility

## DETOXIFICATION REDEFINED BY PHYTOSOME TECHNOLOGY

Thorne Research has teamed with Indena S.p.A., the worldwide expert in botanical extract technology, to bring health-care practitioners exciting new phytosomes that demonstrate marked enhancement of bioavailability, significantly greater clinical benefits, and assured delivery to the tissues. Phytosomes are specific plant extracts that are bonded to phosphatidylcholine, which greatly increases the absorption and blood levels of the desired botanical constituents.

# absorption you've been aching for™

Meriva (curcumin phytosome) provides your patients with significantly more bioavailability than any curcumin extract or compound available. Phytosomes are created by a patented process that binds an herbal extract to phosphatidylcholine, a principal element of cell membranes. This unique phytosome complex easily crosses the gut barrier, unlike common herbal extracts, and results in significantly higher blood levels than standardized 95% curcumin extract. MediClear Plus contains Meriva for maintenance of a normal inflammatory response.

Meriva® (Curcumin Phytosome), Leucoselect® (Grape Seed Phytosome) and GreenSelect® (Green Tea Phytosome) are registered trademarks of Indena S.p.A.

MediClear Plus also contains Greenselect® green tea Phytosome, a decaffeinated, standardized green tea polyphenol extract, complexed with phosphatidylcholine. Like many polyphenolic compounds, green tea catechins have limited absorption, requiring large doses to achieve benefits. When complexed with phosphatidylcholine as a phytosome, absorption is significantly enhanced.

Grape seeds are a rich source of flavonoid polymers called oligomeric proanthocyanidins, or OPCs. These flavonoid substances are made mostly of catechin and epicatechin molecules bound together. Complexation of polyphenols with phospholipids in phytosome formulations improves their oral bioavailability, which is generally low and erratic. Leucoselect® (grape seed) Phytosome markedly elevates blood total antioxidant capacity and helps moderate allergic and inflammatory responses by reducing histamine production.

Phosphorus	220 mg. 22%				

Other Ingredients: Rice protein, rice bran, silicon dioxide. Contains ingredients derived from soy (phytosomes).

UltraChrom® is Thorne's trade name for Chromium (4 oxopyridine, 2,6-dicarboxylate, arginate). Protected under U.S. Patent No. 5,665,305; Quercetin Chalcone is a water-soluble form of Quercetin. Protected under U.S. Patent No. 5,977,164.

## MEDICLEAR PLUS AND THE DETOXIFICATION PROCESS.

MediClear Plus is a rice protein based product with a full complement of vitamins and minerals. Providing essential nutrient cofactors, while supplying an adequate amount of low-allergenicity protein, can be very beneficial to liver function. Health-care practitioners know many problems can arise when a patient's liver is not functioning as it should, including poor digestion, allergies, high cholesterol, intestinal flora imbalances (dysbiosis), and chronic fatigue. MediClear Plus includes beneficial detoxification nutrient cofactors, as well as an array of extra nutrients and botanicals in powder form that can be added to water, or fruit or vegetable juice, resulting in a pleasant-tasting beverage.

## PHYTOSOME TECHNOLOGY

Marked enhancement of bioavailability  
Significantly greater clinical benefits  
Assured delivery to the tissues  
No compromise of nutrient safety

## MEDICLEAR PLUS

a new, great tasting, high-quality rice protein without any flavorings or sweeteners for optimal purity and flexibility
